PROJECTS

WhoApp | (Personal Project) | [Source Code](#) | Swift Programming Language

- Forgetting someone's name or their face, or where you met them. "WHO" app solves your problem, by taking a note of their name, picture, and adding a location and event tag (custom) to their details.
- Used "SwiftData" to create a locale database for the storing of the contents of the app
- Integrated "iCloud syncing"

[Portfolio Website](#) | (Personal Project) | [Source Code](#) | HTML, Css, JavaScript

- Developed a personal portfolio website to showcase my skills and projects.
- Enhanced user experience with JavaScript, implemented a welcome screen.
- Used CSS media queries to ensure responsiveness across all devices.
- Deployed using Firebase and integrated Google Analytics for tracking.

PDF Scanner | (Personal Project) | Java Programming Language

- Developed an android application using Java and OpenCV Library, in Android Studio
- Implemented simple and minimalistic user interface using XML
- Integrated Application Crash report system using Google Analytics
